Green and sustainable chemistry are one of the today's research frontiers, and have been attracting international attention. The 11th International Conference on Supercritical Fluids-Supergreen 2019 will be held on September 27-29, 2019 in Xi’an, an ancient capital city of China. This conference aims to bring together international experts covering different aspects of supercritical fluids to exchange and share their experiences on all aspects of Supercritical Fluids and Supergreen. It is also an interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent advances, trends, and concerns as well as practical challenges and solutions adopted in the fields of Supergreen.

Theme:
Supercritical Fluids Promote Innovation and Development.

Subjects and Topics:
The conference will cover all aspects of supercritical fluids from fundamental and theoretical aspects to technical approaches. The related areas include but are not limited to the followings:

A. Physical and chemical properties in supercritical fluids
B. Chemical reactions in supercritical fluids
C. Supercritical fluids and novel materials
D. Supercritical fluid technology
E. New supercritical fluid equipment
F. Supercritical fluid and other green solvents

Scientific Sessions:

The official language of the conference is English which will be used for all the presentations and printed materials. This conference includes plenary, invited and oral presentations as well as poster presentation.

Organizers:

Asian Supercritical Fluids Association
Supercritical Fluid Technology Committee, Chinese Chemical Industry Association

Hosts:

Shaanxi University of Science & Technology
Institute of Chemistry, Chinese Academy of Sciences

Scientific Committee:

Professor Buxing Han (Institute of Chemistry, Chinese Academy of Sciences)
Professor Tadafumi Adschiri (Tohoku University, Japan)
Professor Motonobu Goto (Nagoya University, Japan)
Professor Youn-Woo Lee (Seoul National University, Korea)
Professor Yan-Ping Chen (National Taiwan University, Taiwan, China)
Professor Jerry W. King (University of Arkansas, America)
Professor Christopher Roberts (University of Delaware, America)
Professor Can Erkey (Koç University, Turkey)
Professor Akira Suzuki (Tohoku University, Japan)
Professor Toshitaka Funazukuri (Chuo University, Japan)
Professor Kwangheon Park (Kyunghoo University, Korea)
Professor Chung-Sung Tan, (National Tsing Hua University, Taiwan, China)
Professor Jya Jyun Yu (Feng Chia University, Taiwan, China)
Professor Suoqi Zhao (China University of Petroleum, China)
Professor Haoran Li (Zhengzhou University, China)
Professor Yukihiko Matsumura (Hiroshima University, Japan)
Professor Satoko Okubayashi (Kyoto Institute of Technology, Japan)
Professor Shin-ichiro Kawasaki (National Institute of Advanced Industrial Science and Technology, Japan)
Dr. Jaehoon Kim (Sungkyunkwan University, Korea)
Professor Ling Zhao (East China University of Science and Technology, China)
Professor Fengyu Zhao (Changchun Institute of Applied Chemistry, Chinese Academy of Sciences)
Professor Weize Wu (Beijing University of Chemical Technology, China)
Professor Zhaotie Liu (Shaanxi University of Science and Technology)
Professor Dan Wang (Institute of Process Engineering, Chinese Academy of Sciences)
Professor Zhiyan Pan (Zhejiang University of Technology, China)
Professor Qun Xu (Zhengzhou University, China)
Professor Jianzhong Yin (Dalian University of Technology, China)
Professor Minhua Zhang (Institute of Chemistry, Chinese Academy of Sciences)
Professor Qilong Ren (Zhejiang University, China)
Professor Jianling Zhang (Institute of Chemistry, Chinese Academy of Sciences)
Dr. Seiichi Takami (Nagoya University, Japan)
Dr. Daisuke Hojo (Tohoku University, Japan)
Dr. Takanari Togashi (Yamagata University, Japan)

Organizing Committee

Honorary Chairs:
Professor Buxing Han (Institute of Chemistry, Chinese Academy of Sciences)
Professor Tadafumi Adschiri (Tohoku University, Japan)
Professor Motonobu Goto (Nagoya University, Japan)
Professor Youn-Woo Lee (Seoul National University, Korea)
Professor Yan-Ping Chen (National Taiwan University, Taiwan, China)

Organizing Chairs:
Professor Jianzhong Ma (Shaanxi University of Science and Technology, China)
Professor Zhimin Liu (Institute of Chemistry, Chinese Academy of Sciences, China)
Professor Zhaotie Liu (Shaanxi University of Science and Technology, China)
Professor Yangmin Ma (Shaanxi University of Science and Technology, China)

Secretary General:
Dr. Zhenhong He (Shaanxi University of Science and Technology, China)

Secretariat:
Dr. Kuan Wang (Shaanxi University of Science and Technology, China)
Dr. Yang Yang (Shaanxi University of Science and Technology, China)
Dr. Xuan Liu (Shaanxi University of Science and Technology, China)
Dr. Weitao Wang (Shaanxi University of Science and Technology, China)
Dr. Ran Ma (Shaanxi University of Science and Technology, China)
Dr. Zhenyu Zhu (Shaanxi University of Science and Technology, China)
Dr. Yongning Ma (Shaanxi University of Science and Technology, China)
Dr. Bo Wang (Shaanxi University of Science and Technology, China)

Call for Papers
Authors are invited to submit an abstract for the conference themes and topics. Please click here to submit your abstract. Abstract submission will be closed on August 26, 2019. You can download and use the abstract template.

Important Dates
Distribution of a Formal 1st circular: April 24, 2019
Distribution of a Formal 2nd circular: June 10, 2019
Deadline for Early-Bird Registration: August 1, 2019
Deadline for submission of Abstract: August 26, 2019
Distribution of the Final Announcement: September 15, 2019
**Registration**

Registration fee will cover lunch and dinner.

Xi’an, one of the oldest cities in China, became the first capital of China in 221 BC when the country was united under the Emperor Qin Shi Huang, founder of the Qin dynasty. A further 14 imperial dynasties followed through to 904 AD. Thus Shaanxi Province is a microcosm of Chinese history, housing more historical and cultural heritage than any other place in China, with many of the interesting sites in the immediate vicinity of Xi’an. Most famous of the historical sites is Qin Shi Huang’s mausoleum and his Terracotta Army. It is also worth noting that Xi’an is now the only city in China to have retained an intact city wall. For those so inclined, you can walk, run, cycle or ride in an electric bus, the full 15 km circumference on top of the wall.

**Contact Us**

All those interested in attending the symposium and receiving further information are welcome to contact:

Dr. Zhenhong He

Shaanxi University of Science and Technology,

Xi’an 710021, China
